

Synthetic Play Surfaces

With the 3rd generation synthetic surfaces in use we at CM5 Ltd can provide fitment or maintenance packages. One of the most common problems is moss; it can cause accidents and slippages. We are equipped to treat and remove the moss using the latest synthetic carpet cleaning equipment. This treatment can be applied as a one off or on regular quarterly bases.

CM5 Ltd has the specialist equipment and personnel to install synthetic surfaces, and have had projects in Europe and West Africa.
